

Where does each of your tasks sit?

Every task you do sits in one of four rooms. Two questions decide which: **can AI do this task well**, and **does the world insist a person owns it**? The rooms hold tasks, not jobs, so most jobs touch more than one room.

Place your own tasks

- List eight to twelve things that take up most of your working or studying week, with rough hours a week for each.
- Ask the two questions of each task, and write its room number (1 to 4).
- Tick the two or three tasks that are the reason anyone would pay for what you do. Which rooms are they in?

Task	Hours	Room	Core?
		1 2 3 4	☐
		1 2 3 4	☐
		1 2 3 4	☐
		1 2 3 4	☐
		1 2 3 4	☐
		1 2 3 4	☐
		1 2 3 4	☐
		1 2 3 4	☐

If your core tasks sit in Room 1, or Room 1 takes more than half your hours, the path you are on was designed for a world that has ended. The book shows what to do next: the four edges worth building, the one-hour Audit and the ninety-day Loop.
